ONLY SUBMIT YOUR SAS PROGRAM WHICH MUST BE CALLED q5.sas

Write a one SAS program with one data step to combine the two SAS data sets:

before.sas7bdat   Exam scores before remedial course
after.sas7bdat   Exam scores After remedial course

into one SAS data set called allscores.

Sort the allscores data set and print it.

Make sure the combined data has exactly two variable:

score and
group which is either Before or After
